

Product Datasheet

TOP1000

Main

Family	Bar supports
Version	Support Rail
Standard length (m)	2
Code	TOP1000 (one code for all configurations)
Reference	TOP PR2000
Number per package	2
Weight (kg)	1.2

Technical Features

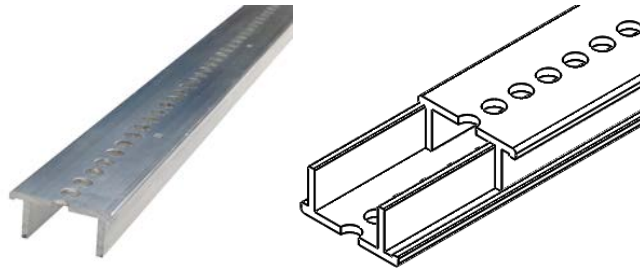

Material: non-magnetic aluminium alloy EN AW-6060 T5

One single code for alla configurations

Made of aluminium

2 meters long

Used double, thanks to the asymmetric shape, it enables the formation of a structure with high mechanical strength (for large horizontal loads)

Please contact Teknomega for non-specified tolerances.
